Transparency Portals

Building Trust in Government

Open Government in Action

All around the world, citizens, investors, vendors and donors are demanding more transparency and accountability in government. Open Government means more than just access to data, it requires data to be easily understood, user friendly and accessible to multiple audiences.

The Transparency and Accountability portals of the FreeBalance Accountability Suite™ support open data and open government

initiatives by providing an accessible platform for sharing government data with the relevant stakeholders.

To ensure that a government's budget is being allocated and spent in line with expectations, governments need to improve accountability of financial, procurement, and spending. This is accomplished by making government spending more transparent and providing more budget execution information to the public.

Web-Based

- Citizens, investors, government officials can access from anywhere in the world

- Supports a portal style interface that enables users to navigate through information

- Enables the use of templates to provide personalization – logos, fonts, headers/footers etc.

- Detailed General Ledger View (Any fiscal year, View by fund category, ministry, category, district, or fiscal period)

Transparency Portals

Building Trust in Government

Transparency and Accountability Portals

The transparency and accountability portals available within the FreeBalance Accountability Suite™ include:

(GPTP) Transparency Portal

Enhances government transparency and builds trust by publicly publishing information related to the fiscal budget execution. Citizens, donors, NGOs, analysts, private sector, etc. can query the data and export into various formats for further analysis.

(GPER) eResults Portal

Allows governments to publicly publish project information in real time: description, beneficiaries, pictures and all relevant information which is automatically updated from the GRP.

(GPPR) Government Portal

Allows government to publicly conduct surveys, publish news, documents and legal content and showcase institutional events.
